I wanted to go with a feminist poster because of the rise in femicides and regression in women rights. I chose the white house because it symbolizes power and I got the photo off of pinterest. I generated the body of a politician and got a screencap from Bill Clinton's impeachment trial of Monica Lewinsky and edited it to make it look like she's sitting at the table. I used an article of domestic abuse from google and blended it onto the carpet. I chose overlay because I wanted the article to look like it was the carpet and maintain the coloring and pattern.

I photoshopped a picture of a fetus that I got off of google to make it look like it was floating. I pasted it on the collage to make it look similar to streamers or curtains. I copied and pasted it and resized it each time to get that effect. I erased parts to make it blend better and then added more copies to fix the edges.
